Onyekachi Nwakaihe

Full-stack Engineer

Tech-savvy Software Developer with 2 years of experience. Eager and open to work to help develop reliable products and test business applications. I have developed a travel agency web app using flight APIs where users can book flights. I am a creative thinker, a team player, a fast learner, and a good communicator.

Experience

April 2021 - Present

MakInsight | Remote

Full-stack Engineer

- Analyzed project requirements, translating specifications into functional application components
- Developed program logic for new applications based on fresh coding and revamped logic from existing applications.
- Coordinated with the QA team to create test plans, properly identifying, fixing, and testing issues.
- Escalated issues and concerns to facilitate resolutions and avoid impacts on timelines.
- Continuously studied and improved abilities with a wide range of web technologies, design tools, and programming practices.
- Checked web pages for compatibility with the browsers, devices, and operating systems commonly used by customers.
- Documented style guidelines to keep the design consistent across the team.

January 2021 - March 2021

Debozgini | 5th Floor Brasas'r Place, Lekki, Lagos

Software QA Engineer Trainee

- Implemented and contributed to improvements in test planning, process, and test case management.
- Planned, executed, and oversaw inspection and testing of incoming and outgoing products.
- Monitored risk management procedures and maintained problem logs to identify and report recurring issues.
- Tested system modifications to prepare for implementation.
- Checked program performance against expected benchmarks and suggested improvements.

March 2019 - September 2019

Swift Networks | Victoria Island, Lagos

Network Engineer Trainee

- Monitored network performance to identify and correct routine problems and serious concerns.
- Handled help desk service calls to troubleshoot, diagnose and resolve network issues.
- Responded promptly to emergencies to manage failures affecting critical business systems.
